

Physicist position:

Physicist with experience in the development, construction and operation of radiation detectors in experimental nuclear or particle physics, medical applications or similar. The candidates are expected to have knowledge in a broad range of technologies involved in radiation detectors, including hardware and software. Experience in the commissioning and data analysis of large detectors in experimental physics is valued. The selected candidate will have a leading role in the development of high-performance photon detectors and electronics for applications in PET scanners, particle physics or astrophysics experiments and others. Requests for additional information and applications including CV and three recommendation letters should be sent to info@petsys.pt.
